## Abcyia red warrior level 9

People are pretty divided about what ninjas can do, or even if they exist. If players listen, however, ninjas can basically do anything and everything, including breaking the laws of the universe, which is more fun than the History Channel, and the way ninja scroll is less traumatic. Red Warrior is an aggressive cute little game where a colorful puzzle platformer plays out a red ninja to save a group of caged villagers from evil ninjas. By using the [WASD] or [arrow] keys to move and jump, the goal is to get first and then move and bash the cage in each level, taking any stars and stones along the way. You can even climb the walls and stick to the most indefinite. You will quickly discover that the road is often blocked by what seems to be in-seversable obstacles, but there is a trick up to the arm ... If he wore arms, which you wouldn't because you're square, but stay with me. When you press [Z] or [X], it flips the world around you so you can turn the landscape back and forth to navigate while your position on the screen remains the same. A transparent copy of you mimics your actions and you can act as a sign for where you will be when you turn the world, but if your copy is crossed out, for example, inside a wall, it is in a place where you can't flip. After a few straight advanced levels, you will eventually have to deal with finding keys and avoiding enemies, blocks that do not climb and can not change their position, and you will discover some stages turn the world vertically instead of horizontally. The game becomes a simple puzzle solving balance that figures out where and when to turn the world, and series that require a little more action and reflexes, such as avoiding star throwing or changing the world in the air with proper timing. Although players who prefer puzzles can find faster bits off-putting, gradually turning the challenge makes for a nice difficulty curve on the whole. It also shines with a beautiful little game, liquid animation and professional polish level that you don't always see with bright, clean design. There's a lot of creativity in the simple concept, and that reflects itself in level design, some of which are real stumps. The Red Warrior is becoming a game you want to have more... smart, fun and accessible to almost everyone. Red Warrior Reviews Date added play: Play Red Warrior on 08/11/2017 !
